

# SABIN ANDREI

---

## SUMMARY

As a dedicated and enthusiastic full-stack developer, I have embarked on a transformative journey in the past six months with the Epicode course, where I have acquired comprehensive coding skills and developed a strong foundation in web development. With a focus on becoming a versatile professional, I have honed my expertise in both front-end and back-end technologies.

---

## EXPERIENCE

**Student, 09/2022 - 05/2023**

**Epicode - Newmarket, Suffolk**

- Completed an intensive and comprehensive full-stack developer training program through Epicode.
  - Acquired proficiency in front-end and back-end web development technologies, including HTML, CSS, JavaScript, React, Node.js, and Express.js.
  - Developed hands-on experience in building dynamic web applications and implementing responsive web design principles.
  - Demonstrated understanding of database management using SQL and MongoDB, including designing and optimizing database structures.
  - Practiced version control with Git, collaborating effectively with fellow learners to manage codebase efficiently.
  - Utilized industry-standard tools and frameworks, including Bootstrap, RESTful APIs, and deployment platforms like Vercel, Cyclic and Railway.
  - Applied agile development methodologies during coursework, fostering effective project management and teamwork skills.
  - Engaged in problem-solving activities, debugging code, and resolving technical challenges to ensure the functionality and usability of applications.
  - Actively participated in code reviews, providing and receiving constructive feedback to improve code quality.
-
